Job Opening Interior & Physical Experience Designer

About DAY

"Together we design places, spaces & brands people love."

DAY brings together brand, spatial, interior and experience design with strategic expertise, in a unique seamless approach to the innovation of spatial and physical brand experience.

DAY is a strategic design partner to national and international brands in the real estate, sports/leisure, entertainment, services, consumer and retail markets. Our current client list includes: Gemeente Alkmaar, Eindhoven Airport, Van Gogh Museum, KNVB Campus & Ziggo Dome.

Are you the Interior & Physical Experience Designer we are looking for?

We are looking for a cross disciplinary, creatively talented person who is conceptually strong, but also has an eye for detail. Who is able to find beauty in design.

Are you able to translate strategy into design and comfortable in creating physical experiences? As an Interior & Physical Experience Designer you know how to bring brand concepts to life through spatial, interior and experience design. You ensure that the design of a place, space and/or brand is not only meaningful, truthful, joyful and convenient, but also strategically, conceptually, functionally and physically coherent.

You are a conceptual thinker who is able to oversee complex projects. In addition, you have an affinity with Brand & Graphic design. If you are also challenged by connecting the digital and physical experience ('phygital'), I think we will be the perfect match.

Together with a vibrant team of professionals, you will work hands-on on different projects as well as with the rest of our DAY team. You will

create outstanding designs for places and spaces, improving the experience of offices, visitor centres, exhibition spaces, retail environments and hospitality venues of all kinds.

Responsibilities

- Study the briefing and requirements of the client
- Understand the client and his target groups, translate market and client information into result-oriented ideas and concepts
- Drawing concepts, making sketches, storyboards, renders etc. and converting these into beautiful designs: responsible for the entire process from start to finish (execution)
- Coming up with new and surprising design solutions with a creative approach
- Create insights that go beyond the briefing
- Define conceptual theme(s) and style direction for the project team
- Understand the project approach, such as planning, budgeting, etc.
- Estimate and communicate work hours, lead time, resource needs and criteria for execution
- Working within project budget and timeframe
- Being able to prepare and give presentations to clients
- Ensure that projects meet the client's expectations
- Work closely with the Strategists, Brand & Graphic Designers and Project Managers
- Supervise and oversee a project and team of other creatives, taking the lead in the process and project(s)
- Keeping a track of trends and developments in the market

Requirements

- Degree or extensive experience in commercial Interior Design
- 5-10 years of relevant experience in Interior Design
- Mandatory skills: Vector works, Sketch up, Illustrator
- Knowledge of Identity, Digital and Brand Design
- Extensive knowledge of materials and furniture and trends in this area
- Conceptual wizard with an understanding of branding and brand strategies
- Understanding the creative and production process
- Strong analytical skills and the ability to meet tight deadlines in a fast-paced environment
- Experience with and understanding of time-management
- Experience in giving presentations to clients
- Experience in guiding other creatives
- Team player, but perfectly capable in working independently
- Communicative, open, curious, energetic and focussed
- Advanced understanding and speaking Dutch is a must. Fluent in English, oral and written.
- Based in The Netherlands
